

PALLET INSULATING CARPETS

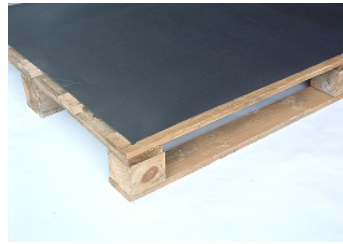

Isoform carpets are designed to complete pallet insulation: positioned at the base of pallets protected by Isoform covers, they avoid cold air escapes from the bottom.

SIBERIA

SIBERIA carpet.
Internal surface: metallic PET.
External surface: PLT.

DISPOSABLE PLT 33

Reticulated PLT carpet, very resistant to compression. Specifically designed for disposable use.

COMPONENTS:

Superficie est.	PLT 12 my
Padding	FGN NET10x10
Int. surface	PET met 12 my
Piping	PES fibre
Sewing	PES fibre

SIZE:

Euro standard	75x120
Different sizes upon request	

COMPONENTS:

Reticulated PLT closed cells	
Density	kg/mc. 33
Thickness	mm. 3

SIZE:

Euro standard	75x120
Different sizes upon request	

FROZEN GEL

Frozen gel helps to preserve cold/ice temperatures during storage and transport of perishables like: frozen and fresh food, pharmaceuticals, cosmetic products, flowers/plants, wine and broadly speaking all merchandises subject to HACCP regulations, D.L.155 etc.

Non-toxic and easy-to-use, frozen gels can be used many times and finally disposed like any other urban waste.

Their usage is quite simple: stored in frozen cells at the requested temperature, gels are then placed within the pallet under the insulating cover (or in specific compartments within **ISOFORM** covers).

Size: 1000 gr

Available in two types: for use at -20°C and at 0°C.
